

# ThermoSecure

by Housecom™

ThermoSecure uses mobile app to unlock doors, open windows, or just check in on the homestead with portable cameras

With a built in ID camera, you can set up ThermoSecurity to only be changed by the unique password in world: your face.

Hands-free communication integration of Amazon's very own AI, Alexa. Set reminders, search the web, play music, and more!

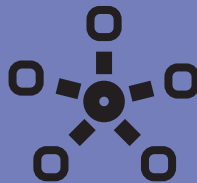

ThermoSecure's built in person detection and removes risk irritating push notifications when a fly buzzes across the camera.

Standard box comes with the ThermoSecure device itself, 5 cameras, 5 programmable sensors, and card with unique QR

**Security**
